

FlexiTrays

TruRoot®
Propagation Media

THE OPTIMAL GROWING ENVIRONMENT FOR YOUNG PLANT PRODUCTION

FlexiTrays consist of stabilized plugs made of peat, other organics and a foam binder. The consistent moisture control and optimal aeration reduce rooting times which means a faster crop turnaround for you. FlexiTrays provide a ready-to-use system that increases the efficiency of young plant production by allowing for earlier transplanting, better crop timing and full automation.

Growers trust FlexiTrays for rooting cuttings and seed germination. The production process we use can fill most North American and European configurations. Our team can also work with you to develop a custom formula to meet the needs of your specific crop. FlexiTrays can be dibbled to foster the optimal environment for seed germination or to allow for maximum stem to soil contact for un-rooted cuttings. The growing medium remains stable in hydroponic production and won't clog filters.

GROWER BENEFITS

- Earlier & easier transplanting
- pH balanced
- Improved aeration
- Uniformity in plant growth
- Custom formulations
- High water holding capacity

TECHNICAL DATA

DESCRIPTION:

FlexiTrays are created by blending the highest quality peat with other organics and a foam binder.

PHYSICAL PROPERTIES:

PH: 5.7 +/- 0.2

EC: 0.8 +/- 0.2

TO USE:

- FlexiTrays are shipped pre-moistened and ready to use
- Mist seeds/water in cuttings. Plugs should be moist to the touch, not wet.
- Monitor irrigation as needed. FlexiTrays have excellent water retention characteristics so be sure not to overwater. Before transplanting out of trays, dry plugs down for easy removal.

STORAGE AND HANDLING:

Store out of direct sunlight in a cool dry location. As with any peat product, wearing gloves when handling is recommended. If product is dry, a dust mask may be worn.

SHELF LIFE:

6 months when stored as directed. Monthly inspections recommended.

DISPOSAL:

Please contact your local waste disposal facility for end-of-life options.
